Module Plus Indoor

Module Plus Indoor by CoSign®

■ Module Plus is a versatile aluminium modular sign system which can be supplied as component or as finished signs. A range of slat panel profiles and sizes are available, based on a 31 mm module. Texting options are screenprint, vinyl or mechanical engraving. The range of side-track profiles include square, angled or curved. All can be supplied mill finish, anodised and powder coated.

■ The concept is deceptively simple and achieves total flexibility. Module Plus can be used for door and wall plates, directories and both single and double sided projecting and suspended signs.

Triangular end caps are available to form desk signs from 31 mm and 62 mm text panels
