“Solar-LED” as it will become known, meets the needs of those customers requiring power to a remote sign location without having to dig up the car park or the street! They are also especially liked by Architects / Designers who continually strive for ‘Greener’ lighting solutions for their customers.

Features and Benefits.

- A ‘Green’ eco friendly energy.
- Once fitted, there’s minimal running costs.
- A power source available for remote locations.
- A variety of fixing brackets.

“Applelec Sign Components introduces their long awaited Solar Panels for use with LED modules, now available, and yes you did here it right Solar Panels a Sign Industry first!”
