Module Plus Outdoor

Module Plus Outdoor by CoSign®

■ *Module Plus outdoor is the complete external directional sign system. As well as being both modular and interchangeable, Module Plus is extremely robust. The system consists of three post options - circular, elliptical and square - together with a range of panels available at 46 mm, 60 mm, 100 mm, 150 mm and 250 mm high. The use of panel supports and 8 mm or 4 mm (reduction profile) thick foam PVC allows the customer to create a custom panel of any depth. Accessories include a range of post caps, post feet and luminaires. Post and text panels can be supplied as components or cut to size lengths in either mill, anodised or powder coated finishes*

Module Plus post @ 90mm with fabricated panel inserts

■ *Module Plus is a versatile and proven exterior product. Module Plus has been used in facilities throughout the world and is resistant against Siberian winters and tropical summers. This modular, updatable system offers a wide range of components that works together to create the custom look you want.*

Module Plus octagonal post fitted with fabricated panel insert

■ Module Plus is a multifunctional modular system that always meet to the client's wishes, whether for simply presenting the company or for a complete programme of signage throughout the company's premises.
